portfolio

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 9+ years of software engineering experience specializing in React.js, TypeScript, and scalable frontend development. Experienced in building reusable UI components, integrating REST APIs, troubleshooting application performance, and implementing automated testing. Background includes leading React development activities, modernizing legacy applications, and transforming AI-generated prototypes into maintainable, production-aligned frontend solutions.

TECHNICAL SKILLS

Core Frontend: React.js, TypeScript, React Hooks

Architecture: Monorepo, Microfrontend

UI Development: HTML5, CSS3, Tailwind CSS, Material UI, Sass, Storybook

State & Data: Redux Toolkit, Redux, Redux-Saga, Redux-Thunk, Formik, Zustand, TanStack Query, REST APIs

Testing & Performance: Jest, React Testing Library, React Profiler, Browser Debugging Tools

Engineering Tools: Git, GitHub, GitLab, Webpack, Docker, Figma, Jira

AI-Assisted Engineering: GitHub Copilot, Codex, Claude, AI-assisted frontend migration

PROFESSIONAL EXPERIENCE

KPMG (RG Manabat & Co.) | Senior Frontend Developer

April 2026 – Present

- Modernize AI-generated Lovable prototypes into maintainable React and TypeScript applications, enforcing established architectural patterns, coding standards, and reusable component practices.
- Develop reusable AI-assisted migration workflows, prompts, and custom development skills to standardize frontend modernization practices.
- Build responsive, reusable UI components using React, TypeScript, Tailwind CSS, and Material UI.
- Implement REST API integration, asynchronous data fetching, and caching with TanStack Query
- Manage client-side state using Redux Toolkit and Zustand.
- Write and maintain component and UI tests using Jest and React Testing Library.
- Use GitHub Copilot & Claude AI to support development, refactoring, and debugging.

FELIX (ZZ Connect, Inc.) | Frontend Developer

July 2021 – March 2026

- Built reusable React and TypeScript UI components using Hooks, Redux Toolkit, Tailwind CSS, Sass and translated Figma designs into responsive interfaces.
- Delivered user and panel management features through REST API integrations supporting create, read, update, delete operations and developed a Post Tender Request feature.
- Diagnosed frontend performance bottlenecks using React Profiler, Redux DevTools and applied targeted optimizations.
- Created and maintained UI tests with Jest and React Testing Library and participated in code reviews and production deployments.
- Remediated npm dependency security vulnerabilities and migrated repository versioning to Semantic Versioning.
- Supported legacy systems through Laravel data migration and CodeIgniter troubleshooting, collaborating with backend engineers, designers, and product managers.

FUJITSU (WeServ Systems International, Inc.) | Application Systems Engineer

September 2017 – April 2021 | Cebu City, Philippines

- Led React frontend development activities, contributing to component implementation, code reviews, testing practices, and technical knowledge transfer across the development team.
- Developed React pages and reusable components using class and functional components, Hooks, Redux, Redux-Thunk and translated Adobe XD designs into components.
- Contributed to a React proof of concept using Hooks, Redux, and Redux-Saga for state management and asynchronous workflows.
- Analyzed legacy VB.NET applications and translated implementation details into technical specifications and troubleshoot frontend performance and UI issues.

EDUCATION

Bachelor of Science in Computer Science | Visayas State University | July 2017
